

## Data sheet TPX-D25.4-f25

### Plano-convex TPX lens with diameter 25.4 mm and focal length 25 mm for THz application

#### Description

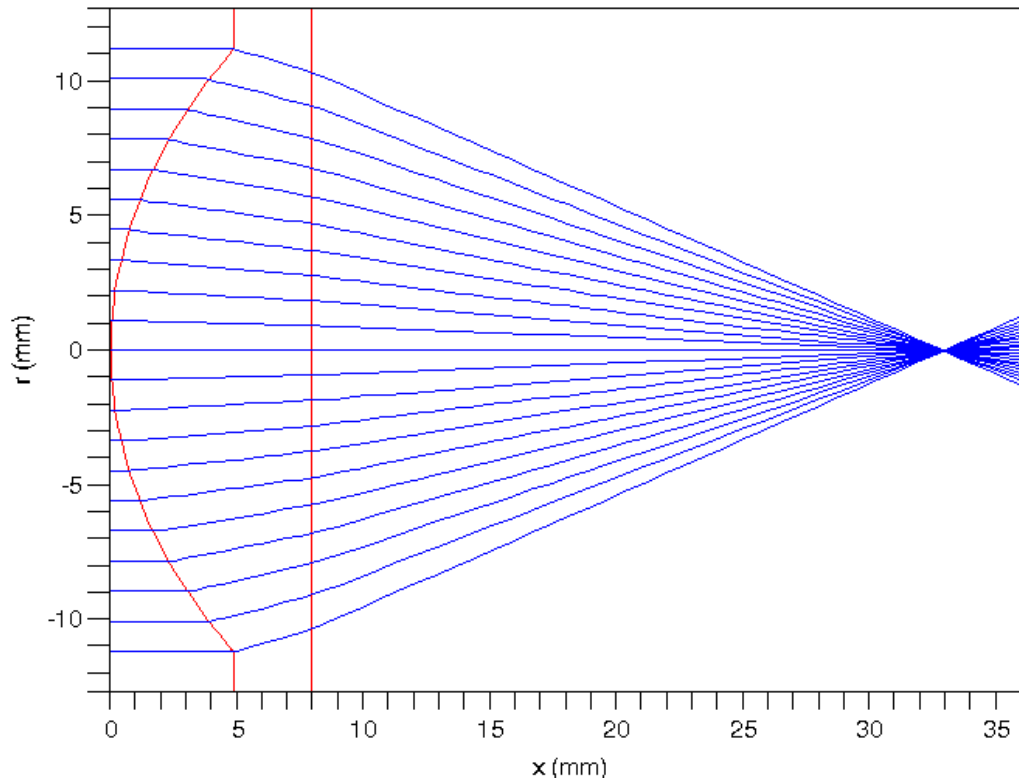

The TPX-D25.4-f25 is a plano-convex TPX (Polymethylpentene) lens for THz waves. It can be used to focus a collimated THz beam.

<b>Lens parameters:</b>	material	TPX (Polymethylpentene)
	refractive index $n$	1.45 @ 1 THz
	absorption coeff. $\alpha$	$0.3 \text{ cm}^{-1}$
	focal length	25 mm (distance flat surface – focus)
	outer lens diameter	25.4 mm
	free aperture diameter	22.4 mm
	maximum lens thickness	8.0 mm
	edge lens thickness	3.1 mm
	aperture angle $\alpha$	$22.5^\circ$
	numerical aperture NA	0.38

<b>Airy disc diameter</b>	$\nu = 300 \text{ GHz}$	1.51 mm
	$\nu = 1 \text{ THz}$	453 $\mu\text{m}$
	$\nu = 3 \text{ THz}$	151 $\mu\text{m}$

<b>Lens tube</b>	outer diameter	30.5 mm
	length	12.7 mm ( $\frac{1}{2}$ " ) or 25,4 mm (1")

## TPX lens 25.4 mm diameter, 25 mm focal length

## Order information

<b>Part number</b>	<b>Description</b>	<b>Photo</b>
TPX-D25.4-f25-0	Unmounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 25$ mm	
TPX-D25.4-f25-t12.7	Mounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 25$ mm, tube length 12.7 mm	
TPX-D25.4-f25-t25.4	Mounted TPX lens with diameter $D = 25.4$ mm and focal length $f = 25$ mm, tube length 25.4 mm
